Announcement of Special Edition of the Journal of Public Health

Public Health is pleased to announce the publication of a special issue devoted to the World Congress of Epidemiology, which comes to Edinburgh this August. The Congress offers the rare opportunity for the global discussion of epidemiology, and this year will look towards the future to discuss the full span of research across the many disciplines contributing to science and practice. *Public Health* has been working with the International Congress Executive Committee to prepare the plenary papers for publication. These will represent the changing face of epidemiology and will focus on discussions on such topics as global health, cutting edge methodology, chronic diseases, neglected conditions, and epidemiology and policy. This special issue, which is to be guest edited by Raj Bhopal and others members of the International Congress Scientific Committee, will be published in late 2011.

**TO REGISTER FOR THE CONGRESS, OR FOR FURTHER INFORMATION
